

OEM MANUFACTURING SOLUTIONS

ABOUT DURACO SPECIALTY MATERIALS

OVERVIEW

- 75 years in service
- 300+ employees
- 6,800 customers

MANUFACTURING

- Duraco HQ: Forest Park, IL
- Filmquest: Bolingbrook, IL
- Infinity Tapes HQ: Lawrence, MA
- 3 Sigma: Troy, OH & Lancaster, OH
- Rayven: St. Paul, MN & Owatonna, MN
- Strata-Tac: St. Charles, IL

Advanced Warehousing

- Forest Park, IL
- Lawrence, MA
- Los Angeles, CA
- Mississauga, Canada

CAPABILITIES:

- Coating, laminating, slitting, die-cutting, and custom conversion
- R&D, design engineering, quality, and regulatory compliance
- Advance warehousing and fulfillment support
- Same day shipping

BROAD, ESTABLISHED CUSTOMER BASE:

- Point-of-purchase (POP), decorative and consumer, flexible packaging, general distribution, general industrial and construction, graphics and communication, healthcare, OEM manufacturing, specialty label, transit packaging and e-commerce

FIVE COMPANIES, ONE VISION, ONE FOCUS, ONE DURACO

Duraco Specialty Materials and its three business units – Duraco Direct, Duraco Specialty Films & Labels, and Duraco Specialty Coatings & Liners – is dedicated to meeting the unique needs of our customers with best-in-class service and responsiveness.

Scan the QR code to learn more about these innovative and complementary companies.

OVERVIEW OEM MANUFACTURING

The Duraco Specialty Materials portfolio of companies offers a complete portfolio of pressure-sensitive tapes, transfer tapes, and release liners perfectly suited for OEM applications and uses. These highly durable adhesive constructions are excellent for standing up to the demanding environments expected when solving OEM needs.

	Tapes & Labels	Liners
Duraco	Pages 5-25	
3 Sigma	Pages 26-28	
Strata-Tac	Pages 29-30	
Rayven	Pages 31-32	Pages 35-36
Infinity Tapes		Pages 33-34

DUBL KOTE®

OEM MANUFACTURING

DUBL KOTE®

Versatile double-sided foam tape ideal for hand or automatic application

Specifications

- Adhesive: Rubber-based permanent on both sides (Not recommended for direct UV exposure. See application notes for more information.)
- Application Temperature: 65°F to 100°F
- Service Temperature: -20°F to 150°F
- Holding Power: 1 lb. per 1 sq. in. of tape (variables in applications can produce different stresses and affect holding power)

Short Rolls, White

1.5" diameter core

Part Number	Thickness in	Width in	Length ft	Rolls/Carton
502613	1/32	1/2	54	180
501737	1/32	1/2	108	80
471366	1/32	3/4	30	45
471367	1/32	1	30	36
471368	1/16	1/2	30	40
500931	1/16	3/4	108	13
471370	1/16	1	30	20
500930	1/16	1	108	10

WHERE TO USE DUBL KOTE®

- Bonding dissimilar substrates including low surface energy plastics
- Structural components like hat channels and brackets
- Bonding trim and components in appliances
- Refrigerators, stoves, washers and dryers
- LCD instrument panels
- Bonding and sealing electrical components
- Seal and fixture hand assembly to glass
- Bonding button assembly
- Sealing and bonding light pipes

TIPS

- Use a roller when hand applying Dubl Kote® to ensure a smooth, even application.
- Firm, even pressure across the entire surface is essential for the adhesive to bond.
- Short rolls are useful to include in kits for on-site assembly or field repairs.

OEM MANUFACTURING

DK FILM® OEM MANUFACTURING

DK FILM®

Provides the tack of our permanent rubber-based adhesive without the thickness of foam tape

Specifications

- Adhesive: Rubber-based permanent on both sides (not recommended for direct UV exposure. See application notes for more information)
- Thickness: 0.5 mil film, 1.25 mil to 2 mil adhesive on each side
- Application Temperature: 65°F to 100°F
- Service Temperature: -20°F to 190°F

Features

- Rubber-based adhesives have good initial tack/quick-stick and are designed to bond to many different types of surfaces
- Pre-cut pieces available for faster assembly of POP displays and signage
- Rolls up to 3,000 feet in length designed to improve efficiencies in automatic applications

DK FILM® ACRYLIC

OEM MANUFACTURING

DK FILM® ACRYLIC

Ideal for demanding indoor and moderate outdoor applications

Specifications

- Adhesive: Acrylic-based permanent on both sides
- Thickness: 0.5 mil film, 1.65 mil adhesive on each side
- Application Temperature: 65°F to 100°F
- Service Temperature: -20°F to 275°F

Features

- Good shear strength
- High temperature resistance; good UV and weather resistance
- Good adhesion to flexible plastics
- Our rolls, up to 1,500 feet in length, are designed to improve efficiencies in automatic applications
- Wider widths are perfect for laminating and wide format graphics

473170	3.5	24	180	5-7/8	2

WHERE TO USE DK FILM® HI-TACK ACRYLIC

- Extrusions
- Nameplates
- Wire raceways
- Plastic fasteners
- Graphic laminating

*Roll diameter listed is nominal with a tolerance of +/- 6%.

DK FILM® LSE

OEM MANUFACTURING

DK FILM® LSE

Double-sided film tape with LSE adhesive system

Specifications

- Adhesive: Rubber-based permanent on both sides
- Application Temperature: 65°F to 100°F
- Service Temperature: -20°F to °F

Features

- Extremely aggressive adhesive
- Quick initial bond to LSE plastics
- Faster bond to UV coated board, UV cured inks, and powder coated metals

475702	16	.045	1	108	-20 to 200

Adhesive promoter: The component substrate determines whether an adhesive promoter should be used. Use of an adhesive promoter can allow a quicker initial and ultimate bond.

Products should be tested in the application before use.

DURACO.
OEM MANUFACTURING

CLEAR HIGH BOND®

OEM MANUFACTURING

Duraco High Bond® tapes are high performance acrylic foam core tapes that meet wide application needs.

DURACO HIGH BOND®

Permanent bond

Features

- Wide Service Temperature Range: -20°F to 300°F
- Aesthetically pleasing — create nearly invisible bond lines without unsightly welds, rivets and screws
- Tamper resistant – permanent bond
- Great for bonding dissimilar metals
- Expanded clear series is perfect for bonding clear acrylic and glass products
- Excellent resistance to temperature cycles
- Unique shock absorption and vibration damping properties
- Good conformability/softness for irregular or curved surfaces

Adhesive promoter: The component substrate determines whether an adhesive promoter should be used. Use of an adhesive promoter can allow a quicker initial and ultimate bond.

Clear series is perfect for glass or clear acrylic applications

WHERE TO USE DURACO HIGH BOND®

- Appliance: replace mechanical fasteners in consumer and commercial appliances
- Design: seamless attachment of decorative panels
- Electronics: LCD displays, hand-held electronic assembly, data enclosures
- Event Promotion: seamless banner assembly and sign installation
- HVAC: replace mechanical fasteners and welding in heating and air conditioning unit assembly
- POP Displays: clean design without unsightly mechanical fasteners
- Sign Manufacturing: interior and exterior sign mounting

DURACO.
OEM MANUFACTURING

POLYOLEFIN GASKETING

OEM MANUFACTURING

POLYOLEFIN

Dust, air and moisture sealing, flexible closed-cell foam

Specifications

- Adhesive: Permanent rubber-based pressure sensitive adhesive
- Test Method: ASTM D3575
- Density (lb/ft³): 2
- Compression Deflection: 2.5 to 5.9 psi
- Compression Set (50%): 41.2 max
- Service Temperature: -20° F to 150° F

Features

- Dust, air and moisture sealing
- Good thermal barrier
- Conformability to irregular or textured surfaces
- General industrial
- Light seal

Rolls

3" diameter core

Part Number	Thickness	Width	Length	Rolls/Carton
	in	in	ft	
472126	1/8	1/2	50	20
472127	1/8	3/4	50	13
472128	1/8	1	50	10

472176	1/2	1	25	10

WHERE TO USE POLYOLEFIN

- Air sealing
- Moisture sealing
- Glazing tape
- Shipping pads
- Packaging
- Architectural

Always start with a
CLEAN SURFACE

Dirty, dusty and oily surfaces
will stop your tape from sticking

OEM MANUFACTURING

HIGH DENSITY URETHANE OEM MANUFACTURING

HIGH DENSITY URETHANE (PORON®)

Low compression set open-cell foam that exhibits closed-cell characteristics when compressed

Specifications

- Adhesives: Permanent rubber-based pressure sensitive adhesive or permanent acrylic-based pressure sensitive adhesive. Our rubber-based adhesive system includes a film carrier for non-stretch characteristics
- Test Method: ASTM D3574
- Density (lb/ft³): 15
- Compression Deflection: 4 to 8 psi
- Compression Set (50%): 10 max
- Service Temperature: Rubber-based: -20°F to 150°F; Acrylic-based: -20°F to 190°F
- Flammability: FMVSS 302 UL94 HBF ≥ 3/16"

Features

- Very low compression set
- Good shock absorption
- Low out-gassing
- Ideal for open/close gasket applications

Rolls

3" diameter core

Part Number	Thickness	Width	Length	Adhesive	Rolls/Carton
	in	in	ft

472091	1/2	1/2	25	Rubber	20
472093	1/2	1	25	Rubber	10

WHERE TO USE HIGH DENSITY URETHANE (PORON®)

- Electrical enclosures
- Access doors/panels
- Louver and vent gasketing
- Lighting
- HVAC enclosures
- Electronics

LOW & MEDIUM DENSITY PVC

OEM MANUFACTURING

PVC

Conformable, weather and oxidation resistant closed-cell foam

Specifications

- Adhesive: Permanent acrylic-based pressure sensitive adhesive
- Test Method: ASTM D1667
- Density (lb/ft³): Low: 7, Medium: 11
- Compression Deflection: Low: 2 psi, Medium: 5 psi
- Compression Set (50%): Low: 8 max, Medium: 17 max
- Service Temperature: Low: -40°F to 180°F; Medium: -30°F to 200°F
- Flammability: FMVSS 302

Low Density Features

- A seal against light, air and moisture
- Excellent weather and oxidation resistance
- Good for outdoor applications

Medium Density Features

- Great barrier protection from moisture and air
- Excellent weather and oxidation resistance
- Excellent conformability
- Flexibility at low temperatures
- Good for outdoor applications

Low Density Rolls, Black

- Construction
- General assembly
- RV/Trailer/Truck

DURACO® VNN

OEM MANUFACTURING

VNN

Oil and chemical resistant vinyl nitrile neoprene blend closed-cell foam

Specifications

- Adhesive: Permanent rubber-based pressure sensitive adhesive
- Test Method: ASTM D1056
- Density (lb/ft³): 4 to 5.5
- Compression Deflection: 4 to 6 psi
- Compression Set (50%): 40 max
- Service Temperature: -20°F to 150°F
- Classification: 2C1, 2C2
- Flammability: FMVSS 302; UL94 HF-1 $\geq 1/16"$; UL94 V0 $\geq 1/2"$

Features

- Good oil and chemical resistance
- Non-stretch characteristics
- Highest flammability rating

Rolls

472052	1/2	1-1/2	25	7
472054	1/2	2	25	5
472056	1/2	3	25	3

FEATURES

- Good oil and acid resistance
- Excellent ozone and oxidation resistance
- Suited for outdoor applications
- Cost effective for HVAC applications
- Common HVAC sizes in stock
- "Skin" surface provides rigidity

WHERE TO USE NEOPRENE NITRILE PVC

- HVAC
- Roof curb
- Window and door gasketing
- General industrial
- Dust sealing
- Light sealing

Products should be tested in the application before use.

SPECIALTY ADHESIVE TAPES

OEM MANUFACTURING

TRANSFER TAPE: 50# LINER/ 2177X/SELF-WOUND

A conformable, high-performance silicone-based permanent transfer adhesive engineered specifically for laminating flexible substrates. The tape shows excellent resistance to high temperature, moisture, ultra-violet light, and chemicals. The tape shows superior converting and die-cutting properties.

- Key Benefits: Resistant to high temperature, moisture, chemicals, and ultraviolet. The tape exhibits excellent converting properties.
- Adhesive: Silicone-based
- Release Liner: Self-wound
- Applications: Sound damping, manufacturing process aids

1.8 MIL WHT PE/SP-1/2 MIL PET /SS1 ADHESIVE B+/40# LINER

A high performance silicone-based adhesive tape optimally designed for brake shim vibration damping offering resilience to a variety of temperature, environmental, and frequency ranges. Ideal for applications requiring dependable adhesive performance despite harsh automotive conditions.

- Key Benefits: Resistant to extreme temperature and environmental conditions. Tape can be custom tailored to “fit” a specific conversion, laminating, or stamping process
- Adhesive: Silicone-based
- Release Liner: 40# Liner
- Applications: Automotive vibration damping

SPECIALTY ADHESIVE TAPES

OEM MANUFACTURING

WHITE POLYURETHANE/SP-NI/60# C2S LINER

A revolutionary label construction featuring a conformable facestock and a custom formulated adhesive system. This highly engineered label construction was developed as an alternative to the traditional iron on label. The material offers a more streamline way to identify clothing, apparel, uniforms, and personal possessions. Brand owners and end users enjoy the products remarkable resilience and ability to withstand traditional wash cycles.

- Key Benefits: no iron label, conformable, writable, printable, washer safe
- Adhesive: Acrylic permanent
- Release Liner: 60# coated two sides (C2S) Liner
- Applications: Clothing, apparel, personal possession labeling

2MIL WHITE CHEM TREATED POLYESTER/2214X/40# LINER

An optimally designed, high-performing, UL-approved, VTM2 Certified adhesive construction. The product's innovative characteristics make it ideal for cell-to-cell bonding for EV battery manufacturing.

- Key Benefits: Highly formulated permanent adhesive systems with flame retardant additives (UL94 & VTM2 Certified)
- Adhesive: Acrylic permanent
- Release Liner: 40# Liner
- Application: Cell-to-cell bonding solutions/EV battery manufacturing

**EXCEEDING YOUR
ADHESIVE EXPECTATIONS**

OEM MANUFACTURING

PRESSURE-SENSITIVE ADHESIVES

OEM MANUFACTURING

60# C2S LINER/2167X/0.5 MIL CLR PET/SP110/SW

A highly engineered double coated differential tape featuring a high performance permanent on one side and an ultra-removable adhesive on the other. The tapes unique properties allow it to withstand the extreme forces, pressures, and contaminants during the manufacturing process.

- Key Benefits: Permanent/removable adhesive systems, resistant to high temperatures, rotational forces, and process contaminants
- Adhesive: Rubber based permanent & Ultra-removable
- Release Liner: 60# coated two sides (C2S)
- Applications: Abrasive pad constructions

1 MIL CLR PET LINER/REP-16A/SW AND/OR 78# LF LINER/REP-4/SW

A multi-purpose transfer tape designed with a non-residue removable adhesive system with excellent quick stick properties. The tape offers repeatable adhesion ideal for assembly and part manufacturing leaving no adhesive residue behind.

- Key Benefits: Good quick stick to a variety of substrates, residue-free
- Adhesive: Non-residue removable
- Release Liner: Self-wound
- Applications: Processing/manufacturing aid

TRANSFER TAPES: 40# LINER/TRL-1/50# LINER

A robust transfer tape recommended for RFID inlays and affixing. This innovative tape can be used to service a multitude of industries including Clothing & Apparel, Personal Care, and boxed Cosmetics.

- Key Benefits: Good for security labeling & aggressive bonding to rubber, cardboard, and low energy surfaces
- Adhesive: Rubber-based
- Release Liner: Either two differential release liners on either side of adhesive, or one release liner with silicone on each side of a self-wound tape
- Applications: RFID inlays & affixing

DURABLE LABELS

OEM MANUFACTURING

CCX2S075 3 MIL WHITE POLYESTER COATED ON BOTH SIDES

A 3 mil matte laser white polyester coated on both sides, making this face stock ideal for high quality digital printing.

- Perfect for printing in high color with digital and flexo print methods
- Designed with laser compatibility, heat resistant, and water resistant properties
- The matte laser X coating offers scratch resistance and high durability
- May be printed on a UV forms press and die cut
- 2.0 mils to 10.0 mils available upon request
- Applications: Durable tags, plastic ID cards, hang tags, key fobs

CCX2S126 5 MIL WHITE POLYESTER COATED ON BOTH SIDES

A 5 mil matte laser white polyester coated on both sides, making this face stock ideal for high quality digital printing.

- Perfect for printing in high color with digital and flexo print methods
- Designed with laser compatibility, heat resistant, and water resistant properties
- The matte laser X coating offers scratch resistance and high durability
- May be printed on a UV forms press and die cut
- 2.0 mils to 10.0 mils available upon request
- Applications: Durable tags, plastic ID cards, hang tags, key fobs

CCX051 2 MIL MATTE LASER WHITE POLYESTER WITH PERMANENT ADHESIVE & CCK LINER

An extremely bright white PET film with a matte laser coating on the face, ideally used for a film label application. Designed with great high color printing properties.

- Rich white coating perfect for high color printing
- Designed with laser compatibility, heat resistant, and water resistant properties
- May be printed with laser, thermal transfer, off set, and flexo printing methods
- Great for use as a premium film label
- Indirect food compliant
- Applications: Durable labels

DURABLE LABELS

OEM MANUFACTURING

LVWE080 3.2 MIL WHITE VINYL WITH OUTDOOR ADHESIVE

A highly durable 3.2 mil white vinyl face stock paired with a 4.6mil layflat liner. The adhesive is a laser safe, outdoor drum label permanent adhesive.

- Ideal for digital imaging when a laser or inkjet topcoat is added
- Very durable, water resistant, and tear resistant face stock
- The liner is printable via flexo, offset, and even some laser
- Clay coat allows for optimal feeding inside production digital equipment
- Skin safe and indirect food compliant
- Applications: Durable labels, drum labels

LPPWIGE088 3.5 MIL GLOSS INKJET WHITE BOPP WITH OUTDOOR ADHESIVE

A 3.5 mil white BOPP face stock with a gloss digital topcoat that is ideal when printing labels with an inkjet print engine. This product features an outdoor adhesive and 42# CCK Liner.

- Durable, water resistant white BOPP
- Gloss top coat ideal for prime label applications
- Compatible with roll label print engines such as Memjet
- Skin safe and indirect food compliant
- Applications: Durable labels

TRANSFER TAPE

OEM MANUFACTURING

Fiber reinforced finger lift tape is a high-performance hot melt tape consisting of a pressure-sensitive adhesive coated onto a PET release liner. A 92 gauge polyester filament is in-laid to increase structural and tensile strength to the end application or direct-to-consumer packaging.

FIBER REINFORCED TRANSFER TAPE SPOOLS

A high performance hot melt finger lift tape consisting of a pressure-sensitive adhesive coated onto a PET release liner with embedded fiber reinforcement to add structural and higher tensile strength.

- Key Benefits: Great strength, highly durable, customizable to meet specific end-use requirements
- Adhesive: Hot melt pressure sensitive
- Application Temperature: 72°F (ambient)
- Service Temperature: 35°F to 145°F
- Classifications: for CONEG, REACH RoHS3, California Prop 65

APPLICATIONS

- Direct-to-consumer/Tyvek® envelopes
- Floor underlayment tape
- Transit tape
- Poly mailers/envelopes
- Construction vapor barriers
- Peel and seal bags

Customizable variations of release liner film, adhesives coat weights, slitting widths, number and type of reinforcements, and custom liner printing.

TRANSFER TAPE

OEM MANUFACTURING

Rayven offers custom transfer tapes and transfer adhesives. These adhesives are coated on one (self-wound) or two release liners. Various liner and adhesive combinations are offered to meet specific customer requirements. Transfer adhesives and tapes can be offered on film, paper, and poly-coated.

TYPE 5000 – 2 MIL TRANSFER

Self-wound transfer adhesives. Typically made with high tack adhesive on one side and removable adhesive on the other.

- Key Benefits: Customizable with supported or unsupported adhesive, same or differential adhesive options on either side of the carrier, available in 48-master rolls or slit to width
- Adhesive: 2 mil high tack clear transfer adhesive
- Release Liner: 60-pound white poly-coated paper
- Applications: Graphic arts mounting applications

TYPE 5015 – 4 MIL TRANSFER

Transfer adhesives often made with high tack adhesive on one side and removable adhesive on the other.

- Key Benefits: Self-wound tape customizable with supported or unsupported adhesive, same or differential adhesive options on either side of the carrier, available in 48-master rolls or slit to width
- Adhesive: 4 mil high tack clear transfer adhesive
- Release Liner: 60-pound white poly-coated paper
- Applications: Graphic arts mounting applications

COMMON TRANSFER ADHESIVE OPTIONS:

- Emulsion acrylic
- Solvent acrylic
- Rubber
- Hybrid systems

TYPE 5005 – 2/1/2 MIL TRANSFER

Self-wound transfer adhesives supplied unsupported or supported with an internal scrim – most commonly polyester or BOPP film. These products are most often made with high tack adhesive on one side and a removable adhesive on the other side.

- Key Benefits: Can be supplied unsupported or supported with an internal scrim of plastic film, two different adhesives can be coated on each side of a scrim-reinforced adhesive or tape, available in 48-master rolls or slit to width
- Adhesive: 2 mil high tack clear transfer adhesive on each side of a 1 mil polyester scrim
- Release Liner: 60-pound white poly-coated paper
- Applications: Graphic arts mounting applications

PAPER RELEASE LINERS

OEM MANUFACTURING

Infinity offers a variety of paper, polyester, and polypropylene release liners. These smoothly releasing liners offer a range of qualities, including metalized film, high temperature resistance, antistatic properties, standard printing, custom printing, and color choices. Compatible with many types of adhesive, there is sure to be a release liner that perfectly fits your application.

42# PAPER LINER

A 42# paper liner coated on one side with easy release silicone.

- Key Benefits: Smooth release, compatible with many adhesives, offered with standard or custom printing
- Release liner: 42# bleached SCK paper
- Coating: Coated on one side with easy release silicone

53# PAPER LINER

A 53# paper liner coated on one side with easy release silicone.

- Key Benefits: Smooth release, compatible with many adhesives, available with standard or custom printing
- Release liner: 53# bleached SCK paper
- Coating: Coated on one side with easy release silicone

DID YOU KNOW?

Infinity Tapes offers a wide range of converting capabilities, including:

- Flexographic printing
- Silicone coating
- Hot melt adhesive coating up to 40"
- Slitting
- Spooling

CUSTOMIZE

- Standard Printing: "Remove Liner to Expose Adhesive"
- Custom Printing

FILM RELEASE LINERS

OEM MANUFACTURING

PET901 MET

A metalized polyester film release liner providing excellent smooth release.

- Key Benefits: Smooth release, compatible with many adhesives, eliminates static cling, offers the highest temperature resistance and highest strength of all plastic film release liners
- Release liner: 1.0mil polyester metallized film
- Coating: Coated on metallized side with easy release coating

PET901

A clear polyester film coated on one side with easy release silicone and printed on the other side with the words, "Remove Liner to Expose Adhesive."

- Key Benefits: Easy release, custom printed wording and colors, compatible with many adhesives, highest temperature resistance and highest strength of all plastic film liners
- Release liner: 1.0mil clear polyester film
- Coating: Coated on one side with easy release silicone, printed on the other side

PP701.2 MET BOPP

A clear printed or unprinted metalized silicone coated antistatic film.

- Key Benefits: Smooth release, compatible with many adhesives, features anti-static properties, is available printed or unprinted
- Release liner: 1.18mil metallized polypropylene film
- Coating: Coated on one side with easy release silicone

PP502

A clear printed or unprinted BOPP film coated on one side with easy release silicone and printed on the other with the words, "Remove Liner to Expose Adhesive."

- Key Benefits: Easy release, printed or unprinted options, custom printed wording, great strength, compatible with many adhesives
- Release liner: 1.38mil clear BOPP film
- Coating: Coated on one side with easy release silicone, printed on the other side

PAPER RELEASE LINERS

OEM MANUFACTURING

Rayven offers release liners with many different release chemistries and a range of release values, ranging from easy to extra tight (10 gpi - 400 gpi), UV cured, and thermally cured releases. Rayven will match the chemistry to the application to yield the desired release performance. Substrate compatibility and heat resistance are also considered when choosing a silicone release coating.

SUPER CALENDARED KRAFT (SCK)

SCK release liners extend beyond traditional paper liners and are smoother than regular paper liners. This allows the ability to work with the majority of applicators making SCK a go-to option for product labels.

- Key Benefits: Polished liner for increased smoothness, highly compatible with many applicators, customizable
- Release liner: Super calendared kraft paper - 38#, 42#, 53#, 78#
- Coating: Silicone

POLY COATED KRAFT (PCK)

Release liners with a layer of polypropylene that ensures a more stable and sturdy liner. The addition of polypropylene acts as a moisture barrier, making this liner ideal for wine labeling.

- Key Benefits: Stable and sturdy performance, ideal for a lay-flat end product, good moisture resistance, great for industries familiar with paper release liners but need moisture resistance, customizable.
- Release liner: Poly coated kraft paper - 60#, 80#, 90#
- Coating: Silicone

CLAY COATED KRAFT (CCK)

Considered the "Economical Paper Liner," CCK release liners are ideal for the general industrial segment where customers prioritize a price point for their liner in the marketplace.

- Key Benefits: Inexpensive, great performance, customizable.
- Release liner: Clay coated kraft paper - 38#, 42#, 54#, 78#
- Coating: Solutions

FILM RELEASE LINERS

OEM MANUFACTURING

POLYESTER

Traditional PET release liners that are compatible with a wide variety of adhesives. These durable liners are difficult to tear or break and are ideal for high-speed applicators.

- Key Benefits: Many gauges to choose from, great tear resistance, ideal for high-speed applicators, good resilience when faced with difficult environments, weather, and moisture.
- Release liner: Polyester film - 92ga, 142ga, 200ga, 300ga, 400ga, 500ga
- Coating: Silicone

LOW-DENSITY POLYETHYLENE (LDPE)

LDPE release liners feature resilience and are challenging to tear or break. These liners are strong enough to withstand difficult environments and are great for use on end products exposed to weather and moisture.

- Key Benefits: Multiple liner thicknesses available, great tear resistance, withstand difficult environments.
- Release liner: Low-density polyethylene film - 1mil, 1.5mil, 2mil, 2.5mil, 3mil – 10mil
- Coating: Silicone

HIGH-DENSITY POLYETHYLENE (HDPE)

HDPE release liners are the perfect choice for applications requiring extra strength and durability. This strong film is resistant to tears and breaks and can withstand challenging environments.

- Key Benefits: Many liner thickness options, extremely strong and durable, resistant to tears and breaks, maintains performance despite difficult environments.
- Release liner: High-density polyethylene film - 1.5mil, 2mil, 2.5mil, 3mil – 10mil
- Coating: Silicone

POLYPROPYLENE

Polypropylene release liners are excellent for use with applications that are exposed to high temperatures and are compatible with a wide array of adhesives.

- Key Benefits: Multiple thickness choices, compatible with applications exposed to high temperatures, compatible with many adhesives.
- Release liner: Polypropylene film - 1.4mil, 1.6mil, 2mil, 3mil
- Coating: Silicone

DID YOU KNOW?

The general categories of silicone release coatings that Rayven uses are thermal curing and UV curing. Within these categories, Rayven has several silicone resins and carriers. The carriers can be solvent, water, or 100% solids where no carrier is needed.
